Quality without Compromise

Hospitality is a demanding industry that has specific, ever-evolving needs. The unique blend and amalgamation of raw materials, breakthrough technology and a quality assurance team, guarantees that all JCPL Fine Porcelain items are kept in line with these requirements.

Dishwasher Safe

Our porcelain is fired at high temperature which making it highly resistant to repeated dish washing cycles at high temperature.

Microwave Safe

JCPL Porcelain products are microwave safe due to their heat resistant layer of glaze.

Thermal Shock Proof

JCPL Fine Porcelain not only retains heat to keep the food warm, but also is resistant to variations in temperature.

High Chip Resistance

The Significant composition of high alumina raw material offers strength and resistance against chipping at critical points such as edges of cups, plates and handles. This configuration reinforces the porcelain, reducing risk of breakage and increasing the product's endurance.
